

PAUSELAB – BECVILLE: USER MANUAL

The PauseLab BeCville web application facilitates community betterment through placemaking and civic engagement. The application will follow the timeline of a community project from the collection of ideas to the finalization of the physical projects.

This user manual will outline the utilization of the PauseLab BeCville website with respect to the various types of users that will be present.

RESIDENT USE OF THE SITE

Residents are users interacting with the site that DO NOT have a user account. They will have access to *Idea Submission*, *Viewing Ideas*, *Voting on Project Proposals*, and *Keeping Up with Projects*

Idea Submission

The Idea Submission feature enables residents to submit an idea that will benefit the community and a location where the idea should be enacted. The Idea Submission feature will only be available during the Idea Collection Phase of the project lifecycle.

There are two ways that residents may submit ideas. The first is by clicking "submit an idea" on the homepage of the website. Another way is to click on the "Ideas" drop down menu on the navigation bar at the top of the page and then selecting "Create Idea". These links will not be available after the Idea Collection phase.

Submit New Idea

* First name

* Last name

* Email

* Phone

* Category

* Description

Once at the Idea Submission page, residents will be asked to fill out a form with basic information about their idea, including a pre-defined category. Residents will also need to specify a location where the idea should be enacted.

Submit New Idea

- Downtown Mall, Charlottesville, VA, United States
- Downtown mall East Main Street, Charlottesville, VA, United States
- united states postal service near Downtown Mall, Charlottesville, V...
- US Post Office East Main Street, Downtown Mall, Charlottesville, V...
- United States Postal Service East Main Street, Downtown Mall, C...

Submit New Idea

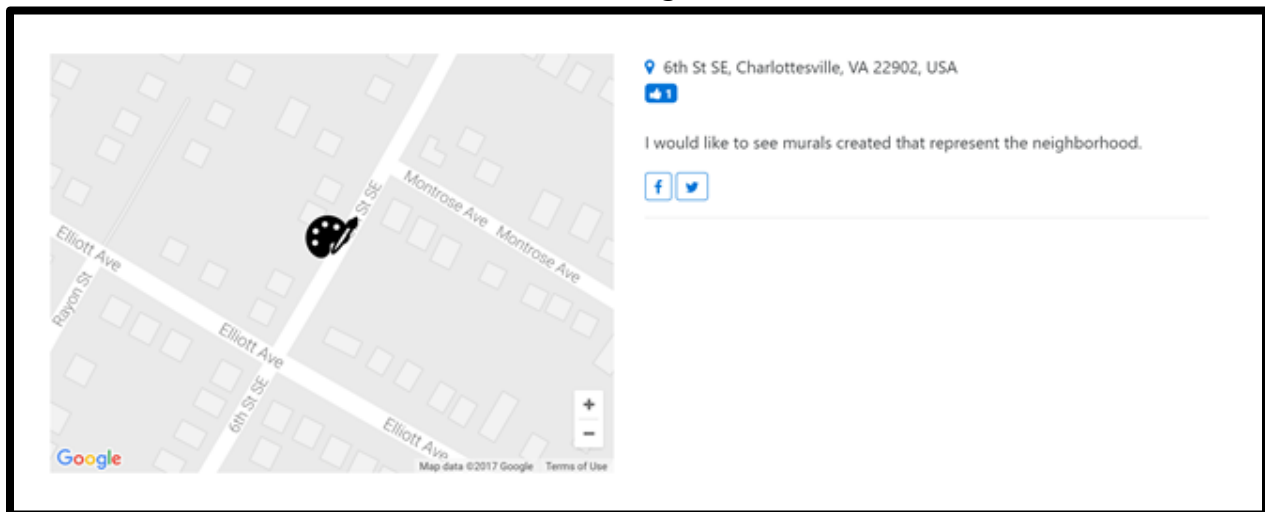

To use the map, the resident will first need to enter a street or location name, then click on the desired result from the search bar. After the map zooms in to the specified location, the resident will then be able to move the red marker around the map to further specify their desired location.

After filling all the required fields and specifying a location, the residents may then submit an idea. The residents will then be redirected to the homepage with a message

confirming that their idea was received. A resident's idea will not be displayed on the homepage map until it has been approved by the steering committee (later section).

Viewing Ideas

During the idea collection phase, residents will be able to view ideas that others have submitted. On the homepage, there is a map that displays icons at the geographical locations of the submitted ideas with respect to the category of that idea. If the user clicks on the idea, they will then be directed to a page containing more details with the option to like the idea, or share on social media through Facebook or Twitter.

Users can also leave comments on the idea by using their Disqus login information.

Voting on Project Proposals

Once the idea submission phase has ended, artists will have the opportunity to submit proposals. During this phase, the public will see the ideas listed on the homepage, with the ability to like the ideas and share them on social media, they can also click on the card corresponding to the idea for more details. These ideas are also sortable by clicking on the sort drop down menu, with sorting available based on fields such as likes and author name.

While the general public does not participate in the proposal submissions, once the proposals have been collected, it is left to the public to vote on which ones should be carried through. When the voting period begins, the homepage of the website changes to reflect the new phase. Users are shown a page that asks them to vote by selecting their top three proposals.

The user must first enter his or her information, including first name, last name, phone number and email.

Pick Your Top Three

Voter Information

First name

Email

Then the user sees a card view of all of the approved proposals and is able to choose up to three that he or she would like to see realized. This is done by clicking the "Select" button on the proposal card, however, this button is disabled for the remaining

cards once three have been chosen, becoming enabled again if one of the chosen proposals is unselected.

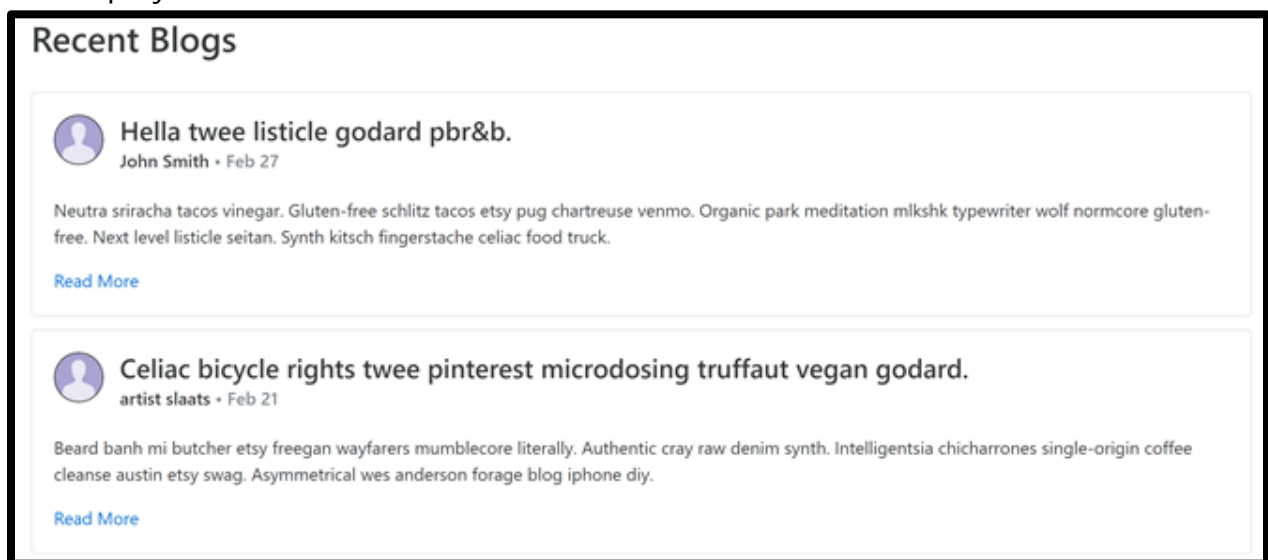

Lastly, the user submits their vote by first ensuring that they have voted fairly by honoring the voting policy by clicking on a checkbox and then clicking "Submit".

I pledge that I live in the district benefiting from these projects, and that I am voting only once. ☐

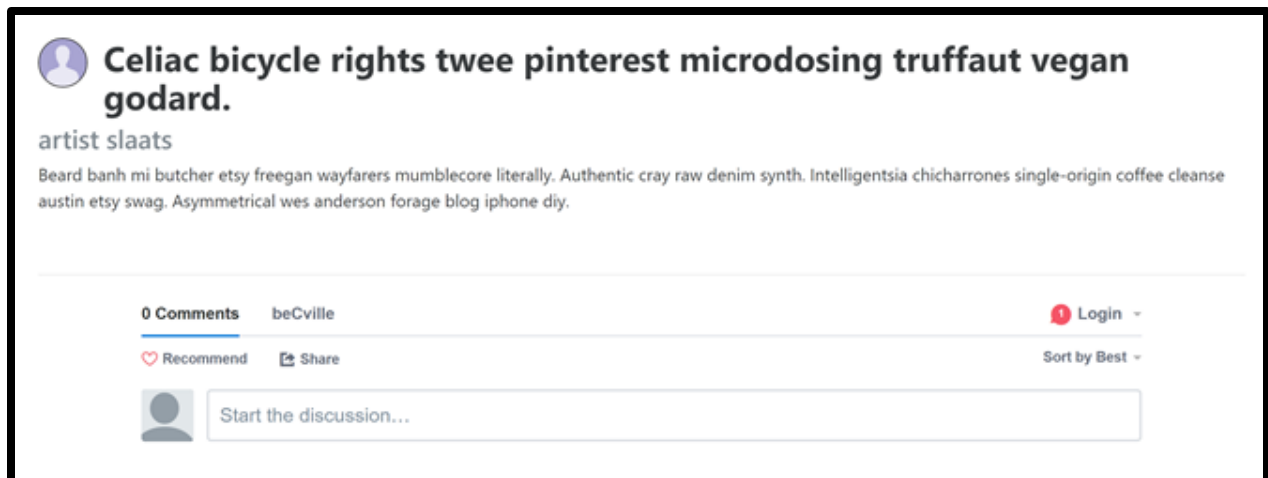

Submit

Keeping Up with Projects

When the voting phase has ended, the homepage will once again change to show recent news updates as blog-style entries. These entries are written by the artists working on the projects and the PauseLab team.

Shown as cards with summaries, users can click "Read More" to see the full entry. A Disqus commenting section is available on the full entry as well to facilitate discussion. The most recent PauseLab updates are always highlighted on the homepage no matter the current phase.

ARTIST USE OF THE SITE

There are two types of artists within the site: artists and the super artist. The latter is an assigned role with permission to post news updates. All artists are able to create ideas, submit proposals, and vote during each phase.

To create an update post, the super artist has to click the news tab and select "Create new post." There, after filling out the title and body, they can hit submit to save the post. The newly created post will appear on the blogs, and will also appear on the home page. The super artist can edit and delete the post by pressing the icons in the bottom-right corner of the screen.

Both super artists and artists can submit proposals. The artist must click the proposal tab and select "create new proposal." There, they will be redirected to the page to completing the form. Items marked with a star are required, such as title and body. After completing, hit submit to save the proposal. Proposals must be approved by a moderator/admin before they appear on the list of approved proposals.

Likewise, with residents, the super artist and artist can submit ideas and vote for approved proposals when appropriate.

Account Creation

Site users, unless assigned by an admin, must create an account for access to features specific to certain roles. However, an account is not needed by the members of the community to submit ideas, view and vote on proposals or follow the blog.

To create an account, users must first click on the "login" button, upon which they will be redirected to the login page.

After the form is completed, the users will have an account with the role of Artist. They may sign out of the website at any time by pressing the “logout” button on the top left corner of the website.

SUPER ARTIST USE OF THE SITE

STEERING COMMITTEE MEMBER USE OF THE SITE

The main goal of the Steering Committee Members is to easily view and evaluate the different proposals to decide which are not only thorough enough, but also beneficial for the community. The main functionality they have are viewing unapproved

and approved proposals and leave comments on proposals that only other committee members and site administrators can see.

On log in a steering committee member is brought to the steering committee homepage which will have instructions on how to navigate the site, and any news the site administrators want them to know.

Committee Members can go to the proposals tab to view a list all proposals, both unapproved and approved. The list can be sorted by title, author name, cost and date created. To view full details of a proposal simple click the "show" button in the rightmost column.

Here a Committee Member can view full descriptions, essays and budget information for a proposal. There is also a feature that allows a committee member to read other comments on a proposal, as well as leave a comment. Only other steering committee members, site admins and moderators can view these comments.

A steering committee member is allowed to create ideas and proposals if they would like. Go to the "Resident Use of the Site" for help with those.
