Public Park

Playground

Activities Center

There aren't any places nearby with a park in my area. I think that there should be one within the Belmont area. It could have things like a tennis court, and a playground

Location: Belmont

South of S Street could use a playground. There's an empty lot that hasn't been in use for the past 5 years

Location: S Street

Within the barracks region, I think having an activities center would be a good thing. It would let Barracks become more of a hangout region, rather than a shopping center.

Location: Barracks

A paragraph of **text** with an [unassigned link](#).  
 A second row of text with a [web link](#)

How should the admin see things? What will it look like for them to edit things?  
 Is it the same with an edit field?  
 More tabs in the homepage?

In terms of editing, the admin could edit the fields on the screen?

Deleting will have a banner asking if they are sure?  
 (Maybe do something about deleting multiple ideas at once?)

## Public Park

A park with 2 tennis courts  
1 bathroom  
1 playground

Budget: \$5000

Location: Belmont

Time: 6 months

What kind of features will the park have?

How large will the park be? There's not a lot of room considering the neighborhoods are surrounding several hills.

Maybe clicking a edit/delete tab will display a list of users under that name

If a user clicks edit, we will go to a new page when we click a name. That page will have the information about the user, and we can change it as desired.

If a user clicks delete, we will display a warning bar asking if we want to delete them. If yes, we remove their name from the list

If a user clicks create, we will take them to an account creation page for their appropriate user type.
